## Our Vision -

To seed talented students for successfully acquiring entrepreneurial skills and enhanced employability at global level.

“ Our Scholarship...  
helps fulfill your Goal ”

## “Success Mantra”

Dear Student Friends,

Today, we are living in a fast paced world, where we need to put in tremendous efforts and be fearless to achieve success. We also need to inculcate the qualities of working smart with determination and persistence, maintain proper planning and be energetic and ready to put in

hard work.

The formula for success is 'PEF', where 'P' Stands for Passion, 'E' for Excellence and 'F' means Focused. We can further explain the PEF Formula with the help of the 5Ds – Dedication, Determination, Devotion, Discipline and Deadline. We should always remember and follow both, the formula and 5Ds, in order to be successful.

I would like to share with you a short story, which encompasses these points. Once a traveler saw three workers at a construction site. He asked the first worker, “What are you doing?” The man answered, “Can't you see, I am doing some construction work.” The traveler then asked the second worker, “What he is doing?” The worker answered, “Can't you see, I am earning my daily living.” When he asked the third worker, “What he is doing?” he answered, “I am creating the most beautiful monument in the world.” This story illustrates how the third worker was passionate about his work, wanted to excel and was focused on building the 'most beautiful monument in the world.' We will always excel in things we are passionate about.

When we are in school or college, we learn about mathematical angles, but through SD-SEED we learn the most important angle, our perception or the way we look at life. All the workers at the construction site were doing the same work, but they perceived their task differently. When you are look at life from a different perspective, you will see something new and you will be able to make a beautiful creation.

Here again, I would like to share with you a short incident, our English teacher used to ask us, “What is the difference between ordinary and extraordinary?” He himself used to

give us the answer, “The difference between the two is only the word 'Extra', means when you do something ordinarily and add that little 'Extra', it becomes 'Extraordinary.' This little 'Extra' is your passion, focus, quest for excellence and your perception.

The most important factor which will help you to achieve success are your Dreams. This will give direction to your goals, plan your future and lead you on the path of progress. Sometimes to make our dreams a reality, we need to take risks or do something differently, which requires us to be courageous and confident. We are all blessed with our own courage and confidence, which is our own inner power and energy, which we need to use and develop to its fullest.

SD-SEED is a good example of all the above points. They are working passionately and courageously with students to achieve their educational goal, develop soft skills, focus on taking them out of the darkness of ignorance into the brightness of knowledge and guide students to give wings to their dreams. Going forward, SD-SEED will extend a helping hand to meritorious students from the district.

SD-SEED through its various programs, focuses on both the educational and overall development of students. These concerted efforts are truly commendable, which also comprises of challenges, such as Drop-Out students, who discontinue their studies mid-term for various reasons. However, keeping in mind today's fast paced time, it is important to overcome challenges and continue your education.

## “SD-SEED inculcates values, such as charity and generosity among students.”

### Dignitaries appreciate SD-SEED at the Scholarship Distribution Ceremony

SD-SEED organized its Scholarship Distribution Ceremony 2016 at Jalgaon, in the presence of dignitaries. On this occasion, The 'Matoshree Premabai Bhikamchandji Jain Scholarship' was awarded to 500 meritorious students from the district. Since 2008, more than 12000 students have benefited from this scholarship, out of which approximately 2700 are either employed or entrepreneurs after completing their higher education. Some of them have also achieved outstanding results in their respective fields. Our beneficiaries have graduated from various disciplines, such as Engineering, Technology, Medical, Computer, Management, Agriculture, Arts, Commerce & Science. We are proud to mention that 62% beneficiaries are from Engineering stream. The thoughts expressed by the Chief Guests while guiding the students & parents is briefly given below:

### Thoughts of the Chief Guests

#### Dr Rajan Welukar – Former Chancellor, Mumbai University

Dr. Welukar while speaking at this occasion, said that to transform society, an attitude of generosity is required, which is present in all beneficiaries.

- Charity and generosity are a part of our education. We should help others with what we have and they may not have. This is the main principle of our education system.
- We have an opportunity to support others, through which development will take place. Primarily, Education and development are interconnected, because higher education will lead to greater development of the country.

#### Prof PP Patil – Vice-Chancellor, North Maharashtra University, Jalgaon

- It is beneficial for society if a hundred people take one step each, instead of one man taking hundred steps. With this thought in mind, Hon. Sureshdada Jain has taken one step ahead and extended a helping hand to meritorious students irrespective of caste and creed. This Scheme ensures that students' education is not disrupted due to financial constraints and motivates students to achieve their goal.

#### Prof Prakash Pathak – Executive Director, Bhonsla Military School, Nashik

Prof. Pathak guiding students in his speech said that when a person is aware of his sense of duty, he is more committed and takes actions which creates good for others.

- When you receive a scholarship, it is important for you to understand the sentiments of the giver and appreciate the financial aid you have received
- This project will be successful only if we have an attitude to help others and understand that it is our duty to do so.

At a glance...

Welcoming the Chief Guest, Lighting the lamp and presentation of citation

Dignitaries, Students and Parents present

Chief Guests handing over the Scholarship to Beneficiaries

SD-SEED conducted 8 Training Programs on various topics in the last four months, which benefited 1300 students.

Venue: Matoshri Premabai Jain Madhyamik Vidyalaya, Jalgaon

Attendees: Approx 90 students benefited

#### ORGANIZING ELOCUTION COMPETITION

The students have hidden talents. In this competitive age to prove yourself, you need to have proper and all round development of these talents and having only book knowledge is insufficient. Keeping this vision in mind, SD-SEED organized an Elocution Competition.

Venue: Jai Durga Madhyamik Vidyalala, Mehrun, Jalgaon

Participants: 25 students in 4 schools

Topic: (1) Environmental Conservation; (2) TV, Mobile & Internet – Advantages & Disadvantages; and (3) Importance of Outdoor Games

Judges: (1) Prof SV Somwanshi – Advisory Committee Member, SD-SEED  
(2) Dr DU Rathod – Professor, Nandinibai Wamanrao Higher Secondary School, Jalgaon  
(3) Mrs Jyoti Patil – Headmistress, Jai Durga Madhyamik Vidyalaya, Mehrun, Jalgaon

The students who came first, second and third were honored and presented with a certificate and gift from SD-SEED. As well as, the consolation prize and certificate were given to one of the disabled student.

## PLANNING FOR EXAMINATION

Everyone is anxious about their exams and all of us ask the question 'who invented exams?' We do not give exams only for securing marks, but it is an opportunity...

- ★ To examine our self;
- ★ To know our self;
- ★ To find an answer whether our efforts are sufficient or fell short;
- ★ To understand if the study method was right or needs to be amended;
- ★ To develop our own capabilities;
- ★ As a practice, to meet the challenges of the future;
- ★ To realize whether we have progressed or are in the same position as earlier;
- ★ To understand what actions lead to success and failure.

### What to do two months prior to Exam?

- Prepare a systematic study plan for School/College, Classes and self-study.
- Allocate 30% of time for writing practice.
- Do not have or listen to negative thoughts.
- Do not hesitate to ask what is not understood.
- Maintain a written list of subject wise topics to be studied, which will help you to focus.

### While going to Exam...

- Take all the necessary material.
- Have a light meal.
- Leave for the exam, considering transport facilities, traffic jam, etc.
- Use a hat or handkerchief on your head as sun protection.
- Reach the exam centre half an hour before the exam.

### In the Exam Hall...

- Ensure the bench is in good condition, else inform the Supervisor.
- The time before the teacher comes to the classroom and you receive the question paper is important, so maintain your composure.
- Do not be afraid or too enthusiastic to answer the Exam.
- Keep your mind calm with positive thoughts.

### While writing Answer Sheet...

- Legibly fill all the information such as your Number, Centre & Date, etc.
- Use Blue or Black ink pen only and keep two additional pens.
- Read the entire paper carefully. Consider the simple questions, as it is important to choose the right ones.
- Draft your answers in your mind and keep it to the point.
- Leave the appropriate margin and write.

- Write the one answer per page. The new answer should start on a new page.
- Do not write Question or sub-question in Answer Sheet, only write their numbers in highlighted letters.
- Write the answer in brief or in detail, according to the marks and expectation.
- Use proper Grammar.
- Use the appropriate words and language for the introduction, main points and conclusion of detailed answers.
- The introduction should be effective and to the point.
- Conclusion should be done summarizing the entire answer and appropriately presenting your opinion.
- The examples, pictures, charts must be used, as required.
- Be careful of English spelling. Write mathematical figures carefully in English.
- Do not put spots, draw pictures or write any instructions for Examiner in the Answer Sheet.
- Writing on first and last page in Answer Sheet should be legible.
- Draw a bold line after completion of the answer.
- The Answer Sheet should be attractive to Examiner. The answers should be to the point and as per the requirement in a few words. This will have a positive impact on Examiner and you will score the best marks.

### After completion of Paper...

- Avoid the discussing the answers with your friends.
- Do not calculate and discuss how many marks you will score.
- If you miss some of the answers, do not think about them; be happy on what is written correct.
- Start preparations for your next paper in earnest.

## LISTENING SKILLS – a useful study technique...

Student friends, your success in exams is not only dependent on your intelligence, but is also determined by your study methods or techniques. All of us study, but, those who make optimum use of study skills, will not face any pressure and will find it is easy to understand what they study. Studies do not pose a problem for such students.

Listening, Reading, Memory, Writing, Observation and Group Discussion are six study skills. We should try and incorporate these skills in our study process, which will help increase our self-confidence and be successful.

### Listening Skills

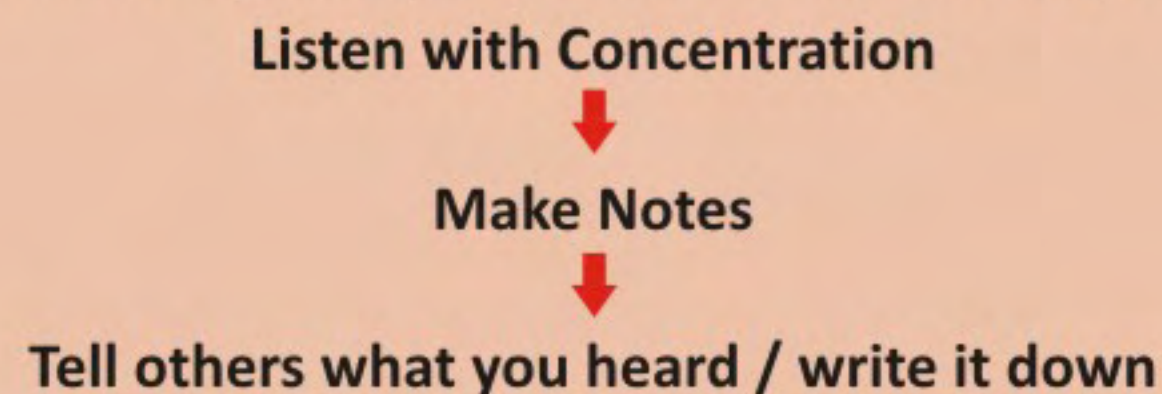

In your day-to-day activities, you listen more than you read or write. You hear different sounds through the day, but you consciously do not understand and remember the sounds. Listening is understands the words and sounds you hear.

### To develop Listening Skills...

- 1 The willingness to listen
- 2 Keep your mind focused
- 3 Identify the purpose
- 4 Identify the key details
- 5 Body language
- 6 Effective use of recording

If you want to develop your listening skills, then you should listen attentively and make it a habit to take down brief notes. This will help you to know what you have understood and not understood. You can request your teacher to explain again the points you have not understood.

You should always explain to others what you have heard, which will help you to understand the information yourself. You will also become aware of points you have missed and make improvements for the future.

### Avoid these distractions to develop Listening Skills

- 1 **Be unbiased about the speaker:**  
You should not have any doubts, misconception and negativity about a teacher or any person who is speaking, as it will not help you to listen with concentration.
- 2 **Mind wanders:**  
While listening, many thoughts cross our mind, it begins to wander and it is then difficult to concentrate once again.
- 3 **Interruptions:**  
Some persons in order to show their intelligence, interrupt the speaker and this disrupts our listening process.
- 4 **Lack of self-control:**  
While listening you should stay away from negative emotions, such as, anger, hatred, insensibilities, jealousy, etc.

### Benefits of Listening

- If you listen skillfully, you will be able to understand what you have heard and you will further develop your understanding capabilities.
- Your writing skills will also improve.
- Develop the habit of taking important notes while listening.
- Your imagination develops.

- ★ To provide opportunities to all deserving students to participate in India of the 21st century
- ★ To spread educational awareness among all stakeholders
- ★ To financially support eligible students for accomplishing their educational goals and occupational aspirations
- ★ To develop and implement a comprehensive package of initiatives resulting in empowerment of stakeholders
- ★ To make the program self-sustainable so that more and more students can benefit

## BENEFICIARIES' TESTIMONIALS

**Tejashri Ravindra Bhargav, Yawal – BE Computers (4th Year)**

I am currently studying in BE Computers (Final Year) at Govt. Engineering College, Jalgaon and have been a recipient of the SD-SEED scholarship since Class 11. This scholarship has been of immense financial assistance. I have greatly benefitted from the discounts I could avail from various book stores for purchasing my educational related material.

**Sachin Bhagwat Patil, Muktainagar – BE Mechanical (4th Year)**

I am very happy to mention that for the last four years I am a recipient of the SD-SEED scholarship. Our financial position is weak and in these circumstances receiving this scholarship is a source of great assistance, which has helped me concentrate and continue my studies uninterrupted.

This scheme launched by Hon'ble Dada is very noble and incomparable. I would like to request Hon'ble Dada to continue supporting needy students like me. May God bless Dada with a long life.

**Aarti Sanjay Sakhalkar, Bhusawal – BCom (1st Year)**

My father passed away in Class 9 and my mother works hard to help me complete my education. I was awarded the SD-SEED scholarship, which has helped me conquer all my educational related financial difficulties. This scholarship scheme started by Hon'ble Shri Sureshdada Jain is highly admired. It has supported my determination and perseverance and which has helped me successfully complete my education.

I will continue to assist students, who are interested in continuing their education. I will always be grateful to Hon'ble Shri Sureshdada, with whose abundant assistance I have been able to achieve my educational goal.

**Aniket Yashwant Aware, Jalgaon – BE Mechanical (4th Year)**

I have received support from various sources in my educational journey. However, the assistance I have received from SD-SEED is the most important and I will always be indebted to them. My father passed away while I was in Class 7. My mother looked after us and I completed my Class 10. I was worried about my higher education, but this scholarship came to like a God send. It helped me pay my college fees and buy the books required.

I am grateful to Hon'ble Dada and his associates for launching this magnanimous scheme, which has lent a helping hand to economically backward students to complete their education. I promise to help SD-SEED in whatever way I can, after I start working.
