“Characteristics of an ideal student”

Expand your outlook

Today students have a broad outlook on life and their education. They are progressing in all fields, from studies, sports, arts, etc. Hence an ideal student is one, who excels in studies, cultivates his passion, is proficient in art as well as applies this knowledge in his/her daily life.

Time Management

Student life is the most important part of one's entire life. It is during this time that a person's future is determined and developed. Once this phase is over, a person gets less time to devote for self-development. Hence, proper time management is essential for students to effectively use their time.

Pure Ethics

An ideal student is not one who is the smartest and scores the highest marks, but one who is fair with all. Indiscipline students often do not respect teachers, break rules, create nuisance for smart and studious students, etc. and such behavior is not expected from them. Students should strive to create a good image and reputation for themselves. They should also take the efforts to study which will help them have a better future.

Importance of Reading

Students are neglecting education due to advancement of modern technologies. 'Read and be saved', this saying has been forgotten by today's generation. Students should participate in lectures, debates and extra-curricular activities which will help them develop an interest for studies.

Focus on your Goals

Students should choose their stream of studies keeping in mind their career goal. They should always focus on their goal and make their choices accordingly. This will help them become an ideal and successful student.

Adopt values for life

Students together with their education should adopt important values such as independence, hard work, social service, co-operation and sacrifice. They should maintain and develop their interests. The teacher plays an important role in a student's life and their teachings are useful in every moment of our life, which they should use for their development.

Be Realistic

Today students' view towards education is changing and it is limited not only till exams. We should also think on how we can put our education to use in our daily life. We need to be realistic and keep ourselves updated in today's environment.

In depth preparation for Competitive exam

The format for competitive exams has changed and there is no guarantee of what questions will be put before you. Hence they need to have a strong foundation. They cannot afford to forget what you learnt in school and college. We think that we have studied a lot and it is sufficient, but we need to continue and maintain the pace of our studies, since for these exams we need nearly one year of preparation. Many students think that going to Pune, Mumbai and Delhi for competitive exams will guarantee their success. However, we can prepare for these exams in our own city by following basic principles, which will guarantee your success.

Importance & Benefits of SELF-DISCIPLINE

What is Discipline?

Discipline means a good and balanced code of behavior, which helps us to maintain self control, follow rules and regulations. A disciplined behavior will help us to focus and achieve our goals. It is mandatory for every person to maintain discipline, whether you are a student, an employee or a businessman. Discipline is most important for students and they can best learn it while studying. It will help students in their studies and overall development.

Self-Discipline & Academics

Recent studies by Psychologists have shown that self-discipline is a key to academic success. Children with high self-discipline behave differently. They were absent less frequently, began their homework earlier in the day, put in more hours of work and spend less time watching television as compared to children with low self-discipline. Perhaps most interesting of all, these scientists found that self-discipline is the one factor, which more accurately predicts the student's result, as compared to IQ.

Benefits of Discipline:

Being disciplined will be beneficial in the following ways:

- **Being focused**
A disciplined person stays focused towards his work, activities or goals and avoids mental disturbances. It is also true that a person with strong goals is more focused and maintains his daily time schedule.
- **Respected by others**
Discipline helps command respect from others. Many struggle to gain respect from others in their workplace, but the easiest way to get respect is to be disciplined.
- **Stay healthy**
Disciplined life includes maintaining regular habits like having meals, medicines, exercising and sleeping at the right time. This will tune the body and mind, so the person always remains healthy. It is said even in case of chronic disease, taking medicines at regular time helps faster recovery.
- **Stay active**
Discipline helps you to maintain a positive outlook to life. There is an enthusiasm and self-confidence from within which keeps the person active. If you notice a disciplined person, you will see he/she is always active in comparison to others.
- **Self-control**
A person with self-discipline has more self-control over himself. He is careful in his use of words while talking, his behavior etc. thus building good relations.
- **Better Education**
Discipline in education is required for getting a better education. Classroom discipline helps students to listen attentively to their teachers hence discipline in schools helps students to develop their mind and body.
- **Stay stress or tension-free**
All of us have tension during competitive exams or daily routine. This is an internal anxiety or unknown fear about the outcome of the work. Staying disciplined helps one study well in advance so he remains tension free. If it is a work place, due to discipline the work is planned well and executed in time so there is no stress. So discipline helps one stay stress-free rise your self-esteem and also get avoid the chances of depression.

That's why discipline is really important and plays a great role in students' school life. Once they follow a disciplined life, they will observe their progress.

SD-SEED PRIDE (ALUMNI) MEET

SD-SEED has been supporting students to achieve their educational goals for a decade and on this occasion organized the first PRIDE MEET on 3rd June, 2018 in Jalgaon. The aim of the Meet was to bring together and provide career guidance for SD-SEED Alumni, who have completed their education thus helping them become self-sufficient. The occasion was graced by dignitaries from the industry, who provided expert guidance on career related issues, such as skills required for successful entrepreneurship, job opportunities, answered career related queries, etc. Alumni also received words of encouragement and inspiration from those, who have overcome hardships and successfully completed their education.

Key Career tips given by the dignitaries:

- Achieve success through determination, self-confidence & hard work;
- Be open to work in any field,
- Know your potential and you will be successful in achieving your goal
- Acquire new skills for better opportunities

OPPORTUNITIES AFTER GETTING LESS MARK

The results of Class 10 and 12 have been blown out of proportion and projected as is shown to be the final battle in a student's life. We have created an image that in case a student does not get the desired marks or fails in any examination then everything is finished. This has led to parents and students thinking only of studies throughout the year.

There is no reason to believe that if anyone gets less marks or fails then the battle of life is lost. There are numerous personalities who could not win the academic warfare, but they certainly did succeed in their respective fields. Hence, students do not get discouraged or disappointed if you got less marks in Class 10th or 12th or competitive exams. On the other hand you should get up and restart with new zeal. You can choose a course based on your passion and launch your career, which will automatically help you save a year.

Opportunities after getting less marks

TECHNICAL EDUCATION

The field of technical education is vast with numerous opportunities available after Class 10. There are three levels of technical education, i.e. Apprenticeship Certificate, ITI and Diploma.

Apprenticeship Certificate: There are many job opportunities available in Mumbai Port Trust, Mazgaon Dock and many other factories. Apprenticeship Certificate Courses ranging from six months to four years are available in ITI and Technical Training Institutes. For more information, you can visit Website, i.e. <http://www.apprenticeship.gov.in>

Various Courses from ITI: ITI Colleges are spread all over Maharashtra. There are various types of courses available with duration of between one to three years. For more information, you can visit Website, i.e. <http://www.dvet.gov.in>

Opportunities available:

After ITI, there are various opportunities available in Government establishments like Railway workshops and factories, but often we do not know about it. Due to lack of awareness students are not able to avail the benefit of thousands of vacancies and job opportunities which are available. Many private companies are also providing opportunities for students who have completed their ITI course. In addition to this, students can also start their own small business, such as Wireman, Beautician, etc. which has a huge demand in the market.

Diploma:

Computer, Mobile Repairing:

If you have done Diploma in Computers after Class 10, it is easier to get admission in Engineering, as you do not need to appear for the Entrance Exam and it also helps in reducing one year of your degree. Computer and Mobile Repairing courses are available in the

Government Polytechnic Institutions and many other private organizations. Apart from this, many other institutions teach some computer software courses, Tally, Website Design, etc. Even after doing this, there are good opportunities for employment and self-employment.

Steno: There is a huge opening for clerical posts in government as well as private companies, the recruitment for such positions is being carried out throughout the year. You can apply for Stenographer post after Class 10 in some organisations. In order to qualify, you should get a Government Recognized Certificate for Marathi and English Typing and Shorthand. Students should also enroll and complete government recognised MS-CIT, a short term computer course.

Hotel Management: After Class 10th, there are job opportunities created by short courses in Hotel Management, such as Bakery, Food Preservatives, etc. These courses are available in Institute of Hotel Management (IHM) and many other private organizations. Home Science is also a great option for girls, after which you can have a career in Hotel Management.

Foreign Language: There are foreign language courses available after Class 10th. These courses can be done while doing your regular studies and can give you a good career as a 'Translator.'

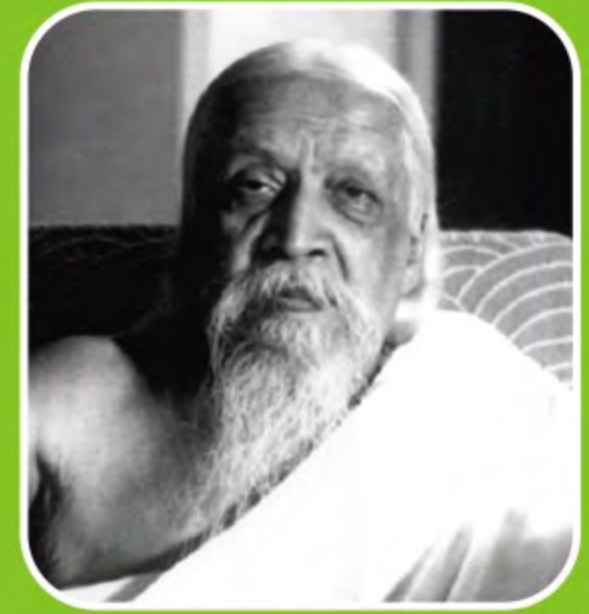

So friends, believe in yourselves and do not get frustrated just because you scored less marks or failed in the examination; start your life with fresh mind and study again. Success is yours.

SRI AUROBINDO GHOSE (1872-1950)

INTRODUCTION

Sri Aurobindo was an intellectual who intensely analyzed human and social evolution. He was an idealist to the core. His idealistic philosophy of life was based upon Vedantic philosophy of Upanishad. He maintains that the kind of education, we need in our country, is an education 'proper to the Indian soul and need and temperament and culture that we are in quest of, not indeed something faithful merely to the past, but to the developing soul of India, to her future need, to the greatness of her coming self-creation to her eternal soul.'

Sri Aurobindo's (1956) concept of 'education' is not only acquiring information, but 'the acquiring of various kinds of information', he points out – its central aim is the building of the powers of the human mind and spirit.

NEED

Aurobindo's Aims of Education

Shri Aurobindo emphasized that education should be in accordance with the needs of our real modern life. In other words, education should create dynamic citizens so that they are able to meet the needs of modern complex life. According to him, physical development and holiness are the chief aims of education. As such, he not only emphasized mere physical development, but physical purity also without which no spiritual development is possible.

The second important aim of education is to train all the senses, such as, hearing, speaking, listening, touching, smelling and tasting. Knowledge power can only be achieved upon achieving purity of senses.

The third aim of education is to achieve mental development of the child. This mental development means the enhancement of all mental faculties' namely-memory, thinking, reasoning, imagination and discrimination etc. education should develop them fully and harmoniously. Another important aim of education is the development of morality. Sri Aurobindo has emphasized that moral and emotional development is essential – only mental development can become harmful to human process.

SOLUTION

Curriculum Transaction

He wished to infuse a new life and spirit into each subject and activity, which would help in developing the human being which exists within students. He laid down the following principle for curriculum

- Child-friendly, interesting curriculum
- Subjects should promote mental and spiritual development
- Motivates children to attain knowledge of the whole world
- Helps the child to be curious, creative and constructive

Teacher-Student relationship

- Nothing can be taught
- Knowledge is already dormant within every child
- The role of the teacher is to suggest, not to impose
- He does not need to impart knowledge; he has to just show the child how to acquire it

SCHOOL

A place that maximizes learning modalities and helps the child achieve his potential at his own pace and allows him to devote time to discover himself.

INTEGRAL YOGA

This is a vital part of Aurobindo philosophy. It integrates physical social behavior to the metaphysical level, a holistic system of inner self-meditation and outer social action.

SUM-UP

Due to the severity of present day international problems, the grand idea of globalization now holds minimal concern for the majority of educators.

Sri Aurobindo Ghosh strived to philosophically reconcile Western scientific rationalism with Eastern transcendent metaphysics into a holistic narrative of reality. His academic interest was interdisciplinary in scope: political science, education, sociology, psychology and philosophy. The ideas of impending human evolution and global futurism became the foundation of his spiritual philosophy, sociological theories, political ideology and educational thought.

- ★ To provide opportunities to all deserving students to participate in India of the 21st century
- ★ To spread educational awareness among all stakeholders
- ★ To financially support eligible students for accomplishing their educational goals and occupational aspirations
- ★ To develop and implement a comprehensive package of initiatives resulting in empowerment of stakeholders
- ★ To make the program self-sustainable so that more and more students can benefit

BENEFICIARIES' TESTIMONIALS

Shreyas Ashok Chandakar, Jalgaon – B.Tech. Mechanical Engg (4th Year)

SD-SEED has been continuously helping needy and meritorious students for last ten years and its entire credit goes to our Hon'ble Shri Sureshdada Jain. This Scholarship scheme originated from his noble thought and like me, many underprivileged students are inspired to continue their education. I received support and strength to fulfill my educational goals, in spite of my family's economically challenged condition.

I have been a beneficiary of this Scholarship for the last six years. When I am financially capable, I will help SD-SEED and will participate in this noble cause.

Leena Kishor Tayade, Jalgaon – B. Design – Fashion Design (2nd Year)

I am a recipient of the SD-SEED Scholarship for the last two years. My family's economic situation is weak. This scholarship is a great source of support for me and due to which I am able to continue my studies in Fashion Designing 2nd year.

My father, who was the only earning member, passed away when I was in the First Year and my family was burdened with financial problems. It was at this time, the financial assistance I received through SD-SEED Scholarship helped me meet all educational expenses. In addition, I could buy stationary and books at a discounted rate through SD-SEED Beneficiary Card. This Scholarship tremendously helps talented but financially weak students to achieve their educational goal. Therefore, I will always be grateful to SD-SEED.

Ganesh Dilip Ahire, Jalgaon – B.E. Civil (3rd Year)

My family's financial condition is very weak. My mother works as a maid and my father is a daily labourer. I am the oldest and have two brothers who are also studying. My parents are not able to bear the financial burden of educating us.

I was aware of the Scholarship awarded to meritorious students by Hon'ble Shri Sureshdada, since I completed my schooling in his school, Maharana Pratap School. I applied and was awarded the SD-SEED Scholarship, which solved the issue of buying Books and Notebooks for me and my brothers. I will be always grateful to Shri Sureshdada for his assistance. This Scholarship Scheme is very beneficial for needy and intelligent students because it financially supports them and I am very grateful for the same.

May God bless Shri Dada with a long and healthy life.

Manoj Kailas Patil, Pachora – Science (SYJC)

I stay in a small village in Pachora. My father passed away when I was very young. My mother is illiterate, she worked as a labourer on farms and brought me up. It was a very difficult situation.

In our village, there was no awareness of higher education, neither was the environment conducive for the same. After passing Class 10, there were additional financial difficulties in continuing my education in Erandol, such as travelling expenses, college fees, etc. It was at this time that I was awarded the SD-SEED Scholarship, which helped me continue studying in Class 11 Science Stream. SD-SEED has played the key role of being my parents and supporting me. I pray that God blesses Shri Sureshdada with a long a life.
